

**GARANGULA POLO CLUB**

Dear Players/patrons:

We ask you to please ensure that no horses brought onto Garangula are suffering from disease or illness, this includes but is not limited to the following list:

- Strangles
- Pyrexia: body temp >38.6 C
- Colic
- Respiratory disease
- Lice or infectious skin disease such as ringworm
- Lameness
- Signs of neurological disease
- Signs of Hendra virus

Any horse with these diseases/symptoms should will not be allowed on the farm

We would encourage horses to be vaccinated against Hendra virus, if horses are from Hendra endemic areas or where fruit bats (flying foxes) reside and display signs consistent with Hendra virus then Hendra virus exclusion testing will be carried out and the treating vets will make a decision as to the ability to treat the horse, this may be limited to minimal treatment so as to reduce the risk of infection to vets and staff.

Yours sincerely,

Matthew Barton  
Estate Manager

Sebastian Mariani  
Polo Manager
